

ENDERS HYBRID LEARNING SCHEDULE

In a hybrid learning setting, students come to campus for part of their school day and learn remotely for the other part of their school day. Enders Elementary School will be deploying an AM/PM Hybrid model across the school to resume in person instruction. In the AM/PM model students are either part of the AM Cohort or part of the PM Cohort, where they are on-campus in the morning or on-campus in the afternoon. Classes run at close to 50% of the typical student count in the hybrid model and students learn remotely, from home, the other half of their school day. Pathblazer, Seesaw (TK-2) or Google Classroom (Grades 3-6) will be used by classroom teachers to provide additional content delivery or skill practice opportunities.
