Dear Parents of Second Grade Scholars,

We would like to suggest your child practice **addition and subtraction facts to 20** for automaticity and speed this summer. Please practice **money** by using coins as well. **The students will add different coin combinations to \$1.00.** They will also be **reading clocks- both traditional and digital-** in 5 minute intervals. This includes **quarter to** and **quarter after** and **half past the hour.** These last two standards are quickly covered in the Spring and we have found the math pacing does not provide enough time to master these skills. Therefore, your help in practicing these skills at home throughout the year will be much appreciated.

Sincerely,

The Second Grade Teachers
