Dear Parents of Second Grade Scholars,

We strongly suggest your child practice **addition and subtraction facts to 20** for automaticity and speed this summer. Please practice **money** by using coins as well. **The students will add different coin combinations to \$1.00.** They will also be **reading clocks- both traditional and digital-** in 5 minute intervals. This includes **quarter to** and **quarter after** and **half past the hour.** These last two standards are **quickly covered** in the Spring and we have found the math pacing does not provide enough time to master these skills. **Therefore, your help in practicing these skills at home throughout the year will be much appreciated.**
